

# Data Management

Ensuring High-Quality, Reliable Clinical Data

- ▶ eCRF Design
- ▶ Database Configuration & Build
- ▶ Data Validation Checks Programming
- ▶ Clinical Data & Audit Trails Review
- ▶ External Data Reconciliation
- ▶ Medical Coding & SAE Reconciliation.
- ▶ Data Visualization & Reporting using **BioGRID**  
Bioforum's analytics and visualization tool.

Certified in today's top clinical platforms, our team delivers reliable, efficient study builds tailored to your needs

## WHY BIOFORUM?

### Expert-Driven Data Management

We combine medical and technical expertise to build strong, collaborative databases.

### Innovative Approach

We use advanced methods to streamline data collection, standardization, and reporting.

### Cross-functional Collaboration

Integrated planning and execution across professional disciplines.

We help lead data management advancements through association events and expert groups.

We actively contribute to the EMEA leadership committee and serve on the board of the organization.
